1931 GAME REGULATIONS

Season for Ducks and Geese Opens at Noon Instead of Dawn

Important changes in Alberta's game regulations for 1931 are announced by Benj. Lawton, provincial game commissioner. Sportsmen are notified that in addition to the duck hunting season being shortened by one month, the season will not open until noon on the 15th of September, instead of at dawn in previous years. This is an important change in the views of the game commissioner, and it is stated Game wardens will be on the lookout at all familiar hunting grounds, to catch any who might try to evade the law in this respect.

In an effort to conserve the duck supplies, decimated by drouth conditions prevailing for the past few years in the breeding grounds, the season in Alberta will close on November 14 instead of December 14th, as in 1930. The bag limits have been slashed in two and hunters will only be allowed to take 15 ducks a day this year, and 100 for the season.

No hunting will be allowed this year of buffalo, elk, wapiti, antelope, swans, cranes, pheasant, beaver and muskrat south of North Saskatchewan river.

The seasons are as follows:

Mountain sheep (one male only), and mountain goat, (one only) September 1 to October 31.

Deer, one male only, except in closed area south of north Saskatchewan river and east of the C.P.R. line from Edmonton to Macleod, thence following range 25 and 26 to the international boundary, November 1 to December 14.

Moose, one male only, and caribou, one only, November 1 to December 14.

Bear, one of each species, females and cubs protected, September 1 to June 14.

Ducks and geese, rails, coots Wilson snipe, south of the Clearwater and Athabasca rivers, September 15 to November 14. North of Clearwater and Athabasca rivers, September 1 to November 15. Duck limits 15 a day, 100 a season. Geese 10 a day.

Sharp tailed grouse, north of Lacombe and Kerrobert C.P.R. line and Red Deer river only, October 1 to October 15. Limit 5 a day, 25 a season.

Hungarian Partridge, October 1 to November 15. Limit 15 a day, 75 the season.

Fox, November 1 to February 28. Mink, fisher, martin and red squirrel November 1 to March 31.

Otter, November 1 to April 30.

Muskrat, north of township 90, February 15 to May 15; between North Saskatchewan river, and township 91, February 15 to April 15.

Sunday shooting is prohibited.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

HARVESTING IN FULL SWING IN CARBON DISTRICT

With the fine weather the past two weeks, most of the grain is about ripe and farmers are out cutting in most parts of the district. While some of the grain is still green, there has been no frost so far to do any damage and with any luck practically all of the wheat in this district will be cut before there is any frost. Some of the wheat has been cut for feed, but most of it will be threshed for crop.

There has not been any threshing done in the district to date, but no doubt, this will be general within the next ten days.

Bank of Montreal General Crop Report

Favorable weather for harvesting has continued throughout the Dominion during the past week, enabling good progress to be made in every province in the garnering of cereals, and bringing other crops to early maturity. As against this there is now a general need for rain to revive pastures and replenish ground moisture for crops still growing. In Manitoba and Saskatchewan harvesting is well advanced and will be general in Alberta this week. In northern areas of the Prairie Provinces feed is plentiful but there are shortages in southern Saskatchewan and Southern Manitoba. In Quebec the hay crop proves to have been of good quality and cereals are yielding well. In Ontario threshing of cereals is well advanced, with excellent yields from wheat, average yields from barley and below average for oats. In the Maritime Provinces, while the hay crop has proved large the quality shows impairment in some sections of Nova Scotia. Other crops all give good promise. In British Columbia threshing has commenced and an average yield of grain crops of good quality is expected.

Northeastern Alberta—Harvesting is fairly general and wheat is yielding 5 to 30 bushels per acre. Coarse grains are yielding well.

Southeastern Alberta—Wheat is 60 per cent cut. The average yield is estimated at around seven bushels per acre.

Western Alberta—Wheat yields are likely to vary from 5 to 25 bushels. Coarse grains are from fair to good. Sugar beets are making good progress.

DUCK HUNTING IN U. S. HAS BEEN CURTAILED

The hunting season on ducks, whose numbers have been seriously depleted by drought, was shortened to one month by a proclamation issued by President Hoover.

The proclamation also applies to geese, brant and coots throughout the United States and Alaska.

The reason of this action is on account of the principal breeding ground in Northwestern United States and in

Movement of settlers from dried-out areas of the province to districts East of Red Deer and North of Edmonton, continued heavy during the past week, according to railway officials.

It is expected that many farmers will take advantage of the three-party offer which enables them to move to more promising districts without any charge. So general has been the requests that an extension of the agreement through which free transportation is allowed, between the government and the railways, has been granted. Announcement to this effect was recently made by Hon. George Hoadley, Minister of Agriculture and Health for Alberta.

So far 235 families have been moved or a total of about 1000 persons, using 470 freight cars for their effects, the cost being born equally by the railway companies concerned and the Dominion and Provincial governments, it was said.

Western and Southwestern Canada being dried up by drought over the last three years.

SUBSCRIPTION EXCHANGE FOR THREE BUSHELS OF WHEAT

In order to carry on for another year The Chronicle is adopting the practice of some other newspapers in the Province and commencing immediately we are offering to take three bushels of No. 1 wheat in exchange for one year's subscription to The Chronicle. All that will be necessary to do will be to fill in the coupon on page 6, in the advertisement and give it to the elevator agent when you haul in your wheat. He will do the rest. This offer is open to old and new subscribers and it is the publisher's contribution to assist business and social life in the community to carry on until the period of depression is passed.

Five-Cent Bonus Regulations Issued

The five-cent bonus to be paid by the Dominion government to wheat growers in Manitoba, Saskatchewan and Alberta is to be a bonus for the growing of wheat, according to regulations governing distribution of the money.

The only exception is in the case of the man on the farm who is paid wages in money, or partly in money or partly by share crop. If he gets wages entirely by share of crop, however, he is entitled to the bonus.

The bonus is not assignable, neither is it subject to garnishment, seizure, attachment or any legal process whatsoever. Persons authorized to issue the bonus certificate cannot issue it to any but the grower of the grain and the regulations state that it must be delivered to him in person, or transmitted to him through the mail.

Arrangements have been made with elevator companies, track buyers, commission merchants and grain dealers to issue bonus certificates on "street" wheat or "graded storage" wheat, while wheat in carload lots will be settled for after official inspection of the grain.

These bonus certificates must bear on the back the declaration of the grower that the wheat was grown in the year 1931 and in the provinces of Manitoba, Saskatchewan and Alberta. When this has been done the certificate can be taken to any chartered bank and turned into cash free of charge. No stamp duty will be levied on these vouchers.

A wrong declaration on grain delivered makes the grower liable to punishment under the criminal code.

Fire broke out in the Gleichen hotel, operated by J. Guttman, at 1 o'clock Friday morning, starting at the rear of the building in the basement from some unknown cause. The flames soon spread over the east wall of the structure. The fire brigade turned out in full force and with the aid of chemicals and water managed to get the fire under control.

Considerable damage was done to the building and also some of the contents.

Editors Note:—The owner of the Gleichen hotel is a brother to I. Guttman, of the Carbon Trading Company.

CARBON BEATS CROSSFIELD

The return match between the Carbon and Crossfield Lawn Tennis Clubs was played at Carbon on August 30th. The result of a most interesting match was a win for Carbon by four events to three, this making Carbon's second win over Crossfield this season, having won at Crossfield on August 16th by five events to two.

An interval was called at 4 p.m. when the ladies of the Carbon Club served a lunch to players and visitors. The customary addresses of welcome were given by the President and the secretary of the Carbon Club and replied to by Mr. A. Stevens on behalf of the visitors.

The following are the results and scores:

Men's Singles

W. Edwards of Carbon defeated T. Goldie of Crossfield, 6-3, 6-4.

B. Ramsay of Carbon defeated A. Stevens of Crossfield 6-3, 6-1.

Ladies' Singles

Mrs. Stevens of Crossfield defeated Miss Vera Poxon of Carbon 6-3, 6-5.

Men's Doubles

W. Poxon and J. Fairbairn of Carbon defeated T. Goldie and A. Stevens of Crossfield 6-2, 6-4.

B. Ramsay and J. MacDonald of Carbon defeated E. Smith and G. Goldie of Crossfield 6-0, 6-0.

Ladies' Doubles

Mrs. Goldie and Miss Goldie of Crossfield defeated Mrs. Willson and Miss V. Poxon of Carbon 6-2, 6-1.

Mixed Doubles

..G. Goldie and Mrs. Goldie of Crossfield defeated L. Poxon and Mrs. Willson of Carbon 3-6, 6-5, 6-3.

FURTHER CUT ON DUCK SEASON UNLIKELY THIS YEAR

Unless the United States government entirely eliminates the shooting season for this year, there is little likelihood of the Alberta government further curtailing its season, declared Hon. George Hoadley, minister of agriculture and health, and acting premier, when a despatch from Regina stated that Saskatchewan proposed to reduce its season.

The minister stated that there was little merit in shortening the season beyond the month that has been already lopped off.

If the season lasted only one week or two, all the hunters would arrange to take their time off in that period, while if shooting was restricted to a certain specified area, all hunters would congregate there.

The whole question of duck preservation, said the minister, rested with the United States. Ducks were hatched and reared in the northern lakes of Canada and in the autumn they flew to the everglades and bayous of the southern States. It is estimated that fully 30,000,000 ducks are shot in the United States each year while about 600,000 fall victims to Canadian sharp shooters. This season more than ever Canadians will require ducks for food quite apart from the sport end of the shooting and the minister feels that no unnecessary curtailment should be made.

Vacation Musings

The writer of this column is on a brief vacation, and he intends enjoying it to the full. During the blistering hot days of the summer with its strong hot winds and choking dust storms he stayed "on the job." Now he has nixed himself to the lakes and the woods to rest and to play. So he proposes to fill his column this week through the medium of a pair of scissors and a paste pot. This is not an altogether unknown procedure on the part of some editors, but open confession is not always made as frankly as in the present instance.

In starting on his vacation, the writer desired to get away not only from the hot city pavements, but even more so from the constant talk of depression, hard times, unemployment, which forms the basis of conversation on every hand. He felt it would be a great relief to get back to Mother Nature, and listen to the rippling of the water, the murmuring of the leaves, the song of the birds, and the droning of the bees and insects.

And for his reading he brought along, not a daily newspaper, nor a fiction magazine, nor text books and bulletins on economics, finance or salesmanship, but some little pocket editions of essays by and wise sayings of other men. And it is with scissors and paste pot in this idle hour that he proposes to pass a few of these gems on to the readers of this column in the hope that, for a little time at least, their thoughts may be diverted from those things which lead to present discouragement. So, here goes:

"Like most garments and most carpets, everything in life has a right side and a wrong side. You can take any joy, and by turning it around find troubles on the other side; or you may take the greatest trouble, and by turning it around find joy on the other side. The gloomiest mountain never casts a shadow on both sides at once, nor does the greatest of life's calamities."

"When you make a mistake, don't look back at it long. Take the reason of the thing into your own mind, and then look forward. Mistakes are lessons of wisdom. . . . The past cannot be changed. The future is yet in your power."

"A great many people criticize and find fault; that's jawbone. Some wish things were better, but do nothing to help; that's wishbone. Others co-operate and do things, that's backbone."

"When you get into a tight place and everything goes against you till it seems as though you could not hold on a minute longer, never give up then; for that is just the place and time that the tide will turn."

"Nothing is easier than fault finding; no talent, no self-denial, no brains, no character are required to set up in the grumbling business."

"The most trifling actions that affect a man's credit are to be regarded. The sound of your hammer at five in the morning, or nine at night, heard by a creditor, makes him easy six months longer; but if he sees you at a billiard table, or hears your voice at a tavern, when you should be at work, he sends for his money the next day."

"The tendency to persevere, to persist in spite of hindrances, discouragements, and impossibilities; it is this that in all things distinguishes the strong soul from the weak."

"Of every good quality, there is an excess which is undesirable. Excess of self-reliance leads to secretiveness and mulish obstinacy; of curiosity to impudence; of imagination to hesitation and inaction; of foresight to indecision; of patience to weak submission; and so on. To give due weight, and no more than its due weight, to each ingredient in the composition of our character, we are fortunate if we are blessed with those twin senses, a sense of proportion and a sense of humor. As a sweetener of life, preserving the rich and successful from odious self-satisfaction and helping all to banish the demons of discontent and ill-will there is nothing to compare with a sense of humour."

"Speaking of unemployment, says 'Life Magazine,' the average man has 12,000,000,000 brain cells. Get busy. Put them to work."

When skies are kind of gloomy,
And the outlook awful dim,
Just keep on keeping on.

Market For Wheat In Ireland

Alberta Natural Resources

**Senator Esmond Of Irish Free State
Points To Opportunity**

Canada should be able to enter into a mutually satisfactory trade agreement with the Irish Free State, in the opinion of Senator Sir Thomas Gratten Esmond, member of the Upper House of the Irish Dail, passing through Montreal after fishing expedition with Lady Esmond among the salmon streams of Quebec.

"Canada should be able to sell us much of our wheat," he said. "The Free State buys three-quarters of its wheat requirements abroad, and there should be no reason why Canada could not make a treaty with us on the same lines as that under discussion with New Zealand and that concluded with Australia. I certainly shall look into the subject when I get back to Dublin."

**Dysentery Is a Very Dangerous
Bowel Complaint**

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours."

"I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Trade In Trees Curbed

**Restrictions Necessary To Prevent
Spread Of Insect Plagues**

Restrictions have been placed by the Department of Agriculture on the movement of poplars and willows from the Maritime Provinces and certain areas in British Columbia because of the satin moth. Gaining a foothold in Nova Scotia and New Brunswick in 1930 after it had made inroads in British Columbia some years ago, the satin moth is a native of Europe and Asia. The restrictive regulations were passed to prevent its further distribution.

Importation into Canada of several varieties of pine wood has been banned by the Department of Agriculture because of insect plagues. On account of the white pine blister rust, every variety of the five-leaved species from all countries has been denied entrance to Canada. Importations of Austrian, Scotch and Swiss mountain pines has been prohibited because of the European pine shoot moth. Recent shipments of pine from these countries have been found to be infested with the moth.

Recipes For This Week

(By Betty Barclay)

PICKLED PEARS

4 quarts pears.
2 pounds white sugar.
2 cups vinegar.
½ ounce stick cinnamon.
¼ ounce whole cloves.

Peel pears. Boil the sugar, the vinegar, the cloves, and the cinnamon for 20 minutes. Place a few of the whole pears at a time in the syrup, and cook them until they are tender. Pack them into thoroughly cleaned jars. Adjust the rubbers, and fill each jar to overflowing with the hot syrup. Adjust the covers and seal the jars immediately.

CUCUMBER CATCHUP

1 quart ripe cucumbers, large.
1 cup white onions.
2 green peppers, medium-sized.
1 pint vinegar.
1 cup sugar.
2 tablespoons white mustard seed.
Salt and cayenne pepper.

Pare the cucumbers. Cut in quarters and remove the pulp. Put the cucumbers, onion, and peppers through a food chopper. Add a small amount of water to prevent sticking, and boil the mixture until the cucumbers are tender. Heat the vinegar, sugar, and seasonings together. Add the vegetable mixture and cook it until it is clear. Seal in clean hot bottles or jars.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestation of internal trouble.

Text Book Changes

Minor Alterations Have Been Made

In Saskatchewan

Changes of only a slight nature have been made in the authorized text book list for both public and high schools in Saskatchewan, Premier J. T. M. Anderson has announced.

Principal changes noted are the literature selections authorized for grade 11 and grade 12. The chief text book in literature has been retained however.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfit for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Survey Of Pasture Lands

A complete survey of all pasture lands in Canada is to be conducted by Prof. L. E. Kirk, of the University of Saskatchewan, announcement of whose appointment as Dominion Agrostologist was made in the House of Commons the other day by Hon. Robert Weir, Minister of Agriculture.

The average woman has no more honour than a man, and when it comes to clothes she has less on'er.

W. N. U. 1905

**Child's Health Should
Be Carefully Checked**

So That Conditions Which Are Handicapping Can Be Corrected

In many places they have what is called summer round-up of the children who are to start school for the first time in autumn.

The idea of the round-up is to have the children medically examined. Those who, at that time, are found to be in need of medical care are sent to their doctor and their dentist for treatment in order that when they start school in the autumn they will be physically fit.

Parents should not wait until the child is ready to go to school to have this done, says the health service of the Canadian Medical Association. However, if they have neglected this point, it is best to attend to it now.

One of the commonest and most serious mistakes that parents make is to allow an abnormal condition to persist with the idea that the child will grow out of it, or that he is too young to have treatment.

The child who cannot see without glasses is obviously handicapped until he has been fitted with proper glasses. The child who has a running ear is almost surely on his way to deafness, which is a serious handicap, unless his ear is properly treated. Children do not grow out of such conditions.

Not only are diseased tonsils and teeth a handicap to the child, but they are dangerous in that they poison the body, and are, it is believed, very often the cause of heart and kidney disease in later life.

No child should be handicapped by conditions which can be corrected by proper treatment. There should be no delay in securing treatment simply because of the mistaken idea that the defects are not serious, or that the child is too young for the treatment or that he will grow out of the defects.

Persian Balm — alluring provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexion of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

Wins Race Around World

Travelling around the world from east to west, K. Fukuma, Japanese newspaperman, succeeded in defeating a colleague who travelled west to east in a race to be first around the world using only regularly established means of travel, he states in a letter received at Vancouver by J. J. Forster, steamship general passenger agent of the Canadian Pacific Railway.

British Columbia Industries

Province Now Ranks Third In Manufacturing In Canada

In 1867, the year of Confederation, British Columbia was credited with 40 factories. Thirteen of these were saw mills and 11 flour mills, leaving 16 others, all of which were at Victoria. In 1901, British Columbia was fourth among the provinces in manufacturing and now ranks third, with about 725 establishments. "These statistics are therefore particularly interesting," says R. H. Arnott, industrial secretary of the Vancouver Board of Trade, "pointing as they do to the wonderful industrial future lying before Greater Vancouver area where 60 per cent. of the entire manufacturing enterprises of the province are located."

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Speedy Mail Delivery

A record for speedy mail distribution was made by the Canadian Pacific liner "Empress of Britain" the other day when letters posted in London at 6:15 p.m., July 28th, were landed in Montreal and distributed before 10:30 a.m. on August 3rd, the time made (with Canadian Airways' planes picking up the sacks at Father Point), being thus 5 days, 16 hours and 15 minutes.

Constant Vigilance Of British Authorities Is Necessary To Suppress Slave Trade In Africa

Those comfortable people who are wont to accept as gospel the glittering generalities of opportunist orators and who, therefore, believe that all is well with the world apart from depression and failure to agree upon disarmament and war debts, may get something of a jolt if they peruse the reports of the recent annual meeting of the Anti-Slavery Society. They have been accustomed to believe that slavery was abolished in all countries with the exception of Liberia. But no less an authority than Mr. J. A. Spender tells us that the menace of slavery is ever-present and that nothing but the constant vigilance and the restraining influence of British rule in the Soudan prevent its revival.

Only a year and a half ago there was a round-up throughout the Soudan by the British, which resulted in the rescue of a number of slaves, the capture of some notorious slave-traders and a further grip by the authorities upon the narrowing channels through which these had been operating. But, as Mr. Spender points out, such round-ups are very expensive, and the Soudan treasury is in no state to stand any strain just now. That in a country as large as Europe slavery should have been virtually wiped out in thirty years is a magnificent tribute to the humanizing and civilizing influences of British rule; but there still remains all over the country a sort of subconscious acceptance of slavery that may not be wholly eliminated for generations. Primitive people are always drifting across the Soudan, and they all have this conception of slavery in their traditions and in their blood.

Even today comparatively few of the Soudanese or the Arabs regard slavery as a crime or an offence, but rather as something the British will not condone and which must, therefore, be concealed or abandoned in toto. Virtually up to the end of 1900 the Soudan had been raided and devastated year after year for long generations by slave-dealers. The British changed that, but if their hands were to be lifted from the Soudan tomorrow, slavery would be in full swing again by the end of the year. It is this knowledge that prompts the British authorities in the Soudan to adhere so strongly to their present policy and to decry interference by stay-at-home politicians whose knowledge of the facts is gleaned from fanatics or from a Cook's tour.

Ontario Grapes

Growers Market Council To Launch Selling Campaign

Designed to promote sales of Ontario's grape crop, unusually large this year, a comprehensive selling and advertising campaign will be launched, according to Charles W. Bauer, secretary of the Ontario growers market council. "Every basket of grapes shipped outside the province will be subject to government inspection to ensure grade and quality," said Mr. Bauer. Ontario grapes would be available all over Canada, he said.

Cop—Hey, there; don't jam up traffic. Why don't you use your noodle?

Automobile Industry

Motor Car In Canada For Each Eight Of Population

The Canadian automobile industry in 1930 was capitalized at more than \$90,000,000, and 158,372 passenger and commercial vehicles were manufactured. Cars scrapped or withdrawn from use during the year numbered 95,241. There are 1,229,888 motor vehicles registered in the Dominion, of which 1,074,494 are passenger vehicles. In 1929 the registration was 1,193,889, and in 1922 it was 1,076,819 for all classes of vehicles. On the average each eight Canadians own a motor car, a ration exceeded only by the United States and the Hawaiian Islands.

A woman never knows what a man thinks of her, although she thinks she does.

Water makes up 50 to 90 per cent of growing plants.

Ten Year Plan For China

Would Convert China Into One Of the Great Industrial Powers Of the World

A "ten-year" plan for China, intended to accomplish much of what the Five-Year Plan is accomplishing for Russia, has been worked out by the ministry of industry.

The plan is intended to convert China into one of the great industrial powers of the world. The plan has been submitted to the government. It embraces 14 points.

The scheme is of unprecedented magnitude and importance. If accepted in the form proposed, and if successfully carried out, the economic position of China will undergo a tremendous change.

The plan is presented by the Ministry of Industries is worked out in great detail.

That the scheme is ambitious is admitted; that it will encounter many difficulties is fully realized, but that the government can carry this plan through is confidently believed if it can win and hold the people's confidence.

Making More Butter

Butter Exports Continue to Show a Decided Increase

As the current year progresses the market report of the Dominion Dairy and Cold Storage Branch makes it increasingly apparent that butter fat is being sent to market in the form of butter to a greater extent this year than for some time past. Receipts at Montreal for butter up to August 1st this year, were 369,327 packages as compared with 242,963 packages the preceding year. Cheese receipts totalled 386,373 boxes for the same period as compared with 452,934 boxes for the preceding year. Butter exports continue to show a decided increase, the total to August 1, 1931, being 76,658 as compared with 2,504 last year for the same period.

Want Lighter Bales

Popular Demand Is For Baled Hay That Is Easily Handled

The Seed Branch of the Dominion Department of Agriculture have received complaints from hay dealers that the present practice by Canadian farmers of putting up hay in bales to weights of 150 pounds or more is killing the market for Canadian baled hay. Popular demand today is for a light bale that can be easily handled by the buyer, who in most cases is a carter or truckman, who has to carry the bale on his shoulder to his feed loft. Bales weighing from 110 to 120 pounds will find a much more ready market than heavier bales.

France's active and reserve military forces comprise 15.4 per cent. of the population.

In New York State one woman in every four now works for wages.

Honor Indian Hero

Meshkiosh, Ojibway Brave and Indian guide attached to the French River Bungalow Camp, is as modest as he is courageous. It is three years since, with heavy odds against him, he rescued Miss Elfriede Ossman and Dr. J. Schwartz, of Chicago, from the eddies of the Blue Rapids on the French River into which they had been flung from an overturned canoe. He told not a word of his exploit which came at last to the notice of the Royal Canadian Mounted Police. Enquiries were set on foot, the facts came to light and the upshot was the presentation to Meshkiosh this month at the French River Camp of the bronze medal for bravery of the Royal Humane Society. The presentation was made by the Indian Agent at a gathering of 120 guests of the camp headed by Manager Jack Strathdee, at which the Chiefs of the tribe in full regalia of feather headdress and richly embroidered coats participated. Meshkiosh (left, bareheaded), is shown in the photograph with the medal which is being examined by an Ojibway Chief.

Greece Is Now Canada's Second Best Wheat Customer, With Importations Steadily Increasing

Reindeer Farm At Churchill

Herd Of 1,000 Reindeer To Be Shipped North Next Spring

Negotiations are under way between a northern syndicate and an Alaska reindeer company for a herd of 1,000 reindeers to be delivered at Churchill next spring. The reindeers will be brought by boat to Vancouver and will be shipped across the continent to their new home about two miles north of the new bay port of Churchill. The chief business of the syndicate is expected to come from Europe. Reindeers can be shipped alive by the cool bay route to Churchill much cheaper than cattle, and their meat is at a premium on the continent.

Cheep food is provided on the barren lands, the only cost will be three or four Eskimo herders. The rate of increase of these animals makes them among the most profitable stock to raise. The reindeers native to the area around Churchill are inferior to the shipment that will be imported both in hides and sizes. An attempt is being made to get federal aid for the project.

For Tourist Traffic

Link Up Highway To Connect Western National Parks

An effort to secure tourist traffic on trips around national parks in western Canada, via Riding Mountain Park in Manitoba to Prince Albert National Park in Saskatchewan; then to Jasper National Park in Alberta, down to Banff, Waterton Lakes, Yellowstone and Glacier, will be made by the Federal Government. According to Hon. Thos. Murphy, all that was necessary before launching such an appeal was to complete a few links in all-weather highways.

No Change In Centuries

An American millionaire now in London, England, who spends thousands of pounds a year on old MSS. and first editions, has a wonderful MS., written in Spanish in 1645 by a notorious old woman-hater.

It might have been written in 1931. The translation reads:

"Modern women—what are they? Just a walking mass of cosmetics, with their plucked eyebrows, crimson lips and stained nails. Modern women think they are so charming. I think they are hateful, and so artificial."

Sergeant, posting sentry and after giving him instruction—"Now, don't forget, if anything moves you shoot."

Sentry—"Yes, and if anything shoots I move."

Greece today is Canada's second best wheat customer with importations to that country continually on the increase, according to Henri Turcot, Canadian Government Trade Commissioner to Greece and Turkey. Canada's best wheat customer is Great Britain.

In 1926 Mr. Turcot was an instructor of languages at the provincial normal school in Saskatoon, and was assistant trade commissioner in Paris and Milan before going to Athens. He is at present touring the Dominion to gain first hand information on business conditions, and will return to Greece in November.

In an interview Mr. Turcot gave an outline of the conditions that exist in Greece and the opportunity for trade with Canada which is present. The trade commission office in Athens has been opened only for two years.

"The general crisis has unquestionably reacted unfavourably on Greek economy and brought about a depression in commercial and other pursuits," said Mr. Turcot. "But the depression can also be traced to a shortage of crops and to low prices obtainable for the staples of Greek export trade. However, it cannot be said that an actual crisis took place in Greece during 1930, nor that one is taking place this year.

"Taking into account the fall in prices, it is evident that the figures relating to the volume of Canadian exports to Greece showed a decided progress.

"This progress is attributable to our wheat having been shipped to the Greek market in a quantity never attained previously. Shipments of Canadian wheat to Greece represented, in 1930, a volume of 9,000,000 bushels, or over one-half of Greece's requirements of foreign wheat, against 7,000,000 bushels in 1929. Larger sales are reported this year.

"The other Canadian products sold in the Greek market comprised tinned mackerel, tinned lobster, tinned sardines, dried and smoked fish, flour, tomato sauce, whisky, agricultural implements and machinery, storage batteries, wood-pulp for artificial silk, wallpaper and jute bags.

"To complete the picture of Canadian trade with Greece, I shall add that in 1930, our imports amounted to \$16,000 against \$25,000 in 1920, the balance of trade being therefore, highly favourable in Canada.

To Hurry Relief Measures

Credit Of Province Of Saskatchewan Behind Relief Program

To enable the various projects to be started as soon as possible, the credit of the province of Saskatchewan will be placed behind the whole relief programme, Hon. Howard McConnel stated recently.

This will prevent any undue delay in the commencement of the relief projects and provision will be made later for having whatever amounts are expended recouped by the Federal Government, he said.

The residents of the province in need of aid enabled to benefit immediately, pending further negotiations with Ottawa concerning the distribution of relief costs.

A case of a man who gave some of his blood to save his child, and at the same time unknowingly transmitted malaria to the child, has been reported.

"Mary, I could write my name in the dust on this table."

Mary: "What a benefit education is, Ma'am."—Moustique, Charleroi.

Polite Hobo: "Your little dawg 'as bit me, lady."
 Lady: "Where?"
 Hobo: "I really couldn't tell yer where, ma'am."
 Lady: "Nonsense. He couldn't reach that height." — The London Opinion

WORLD HAPPENINGS BRIEFLY TOLD

John Tamar, who served as a farm hand on a farm near Debreczin, Hungary, for 101 years, died at the age of 112.

Thomas A. Edison, noted scientist, is on his way to complete recovery from his recent illness, Dr. Hubert S. Howe, his physician has announced.

Estimated cost of providing relief work to Vancouver's unemployed men with dependents, of which the city must bear an undetermined portion, will be about \$450,000 a month.

Excavations on the site of the new Royal Bank of Canada in London, England, have resulted in the discovery of an 1,800-year-old jig-saw puzzle in a Roman pavement.

In the two weeks from August 1 to August 15, 114,000 workers lost their jobs in Germany, bringing the country's total of unemployed to 4,104,000.

Approximately 10,000 head of cattle have been shipped from Canada to the United Kingdom so far this season, according to information in the office of the Hon. Robert Weir, Minister of Agriculture.

Total grain shipments from Vancouver for the crop year ending July 31 were 75,154,053 bushels, an increase of 25,480,745 bushels over the figure of 49,673,308 bushels shipped in the previous crop year.

During the months of May, June and July, the fog horn was sounded a few minutes over 772 hours, a period, had it been continuous, of over thirty full days, stated the keeper of the Yarmouth light and fog alarm at Cape Forchu, Nova Scotia.

A reduction of two per cent. in the Canadian birth rate in the first seven months of the year is shown by a preliminary report of the Dominion Bureau of Statistics. The total to the end of July was 50,851 births, as compared with 52,057 in the corresponding period of last year.

Montreal Grain Deliveries

Grain deliveries from the Port of Montreal for the season to date topped the fifty million mark on August 4th, the amount shipped being 50,093,867 bushels. This figure compares with 40,260,982 bushels in the corresponding period of last year. Grain receipts at the port had reached the fifty million bushel mark several days earlier.

If you wish to know how explorers feel frozen in the ice, tell a woman she looks fine in spite of her age.

"Do you belong to the town?"
 "No."
 "Then we're neighbours. I don't come from it either." — Lustige Kolner Zeitung, Cologne.

SUNDAY SCHOOL LESSON SEPTEMBER 6

TURNING TO THE GENTILES

Golden Text: "I have set thee for a light of the Gentiles, that thou shouldest be for salvation unto the uttermost part of the earth." — Acts 13:47.

Lesson: Acts 13:13-52; Romans 1:14-16; 11:1-24.

Devotional Reading: Psalm 72:6-13.

Explanations and Comments The Result Of Paul's First Sermon In the Synagogue At Pisidian Antioch, Acts 13:42-44.

—After Paul's sermon, he and Barnabas withdrew from the synagogue, while the congregation remained for the end of the service and the formal dismissal. As they left they were urged to speak again the following Sabbath. When the synagogue services were over, many Jews and proselytes (Gentile converts to Judaism), followed Paul and Barnabas to their place of abode and Paul urged them to continue in the grace of God. This is the first use in The Acts of the phrase, "the Grace of God," i.e., "redemption from sin freely offered in Christ." "Grace" expresses the spontaneity and generosity of God's love; God freely grants His pardon and bestows His love in Christ.

The Jealousy and Antagonism Of The Jews Aroused, Acts 13:44, 45.

—As a result of the wide-spread discussion of Paul's sermon and of the work of Paul and Barnabas during the week that followed, "almost the whole city was gathered together to hear the word of God" on the next Sabbath. (A different Greek phrase is used in verse 42 for "the next Sabbath" from that in verse 44, and some scholars translate it in verse 42 as "during the intervening week.") "The Jewish congregations had a portion of the Law read in the synagogues not only on the Sabbath but on Monday and on Thursday mornings, that they might not be for three days without hearing Scripture. The peculiar expression may apply to the meetings in the synagogue on these days." — P. Rawson Lumby.

The preaching of Paul during the week created a tremendous interest.

When the Jews saw the multitude they were filled with jealousy. Their antagonism was due primarily, not to opposition to Paul's words, but to envy of his success. It was not loyalty to sacred truth which led the Jews to contradict Paul and to blaspheme.

Turning To the Gentiles, Acts 13:46-49.

—Finding that the Jews would not hear them, Paul and Barnabas spoke out boldly and said, "It was necessary that the word of God should first be spoken to you. Seeing ye thrust it from you, and judge yourselves unworthy of eternal life, lo, we turn to the Gentiles."

This speech of Paul's is "an apology for the Gentile Mission, which occurs frequently in the following narrative and appears to suggest that the apostles would not have spoken to the Gentiles at all, if the Jews had listened to their brethren." — Dummelow.

Notice the well-guarded balance between God's sovereign purpose for man and man's free determination of his own life: "It was necessary," but "ye thrust it from you, and judge yourselves unworthy." "The revelation of Divine Grace in the gift of Jesus Christ, the token of eternal life in His resurrection from the dead, the offer of spiritual freedom, of pardon, peace and joy,—all were thrust from them, repudiated and rejected because these things were to be a common heritage." — John Gardner.

Persecution, Acts 13:50-52.

—The hostile Jews now had recourse to "the devout women of honorable estate, and the chief men of the city"—the Roman colonists, the local aristocracy, as Professor Ramsay calls them, who were the high-privileged class and held the reins of government. These joined forces with the Jews in persecuting Paul and Barnabas till they were driven from the city.

More than 100,000 timepieces were imported into British Malaya last year.

Chemists have developed five methods of making artificial silk.

To Combat Drought Causes

Saskatchewan Seeks Means For Assisting Dried-Out Areas

The Saskatchewan Government has appointed a voluntary commission of six, headed by Hon. J. F. Bryant, K.C., Minister of Public Works, to investigate all contributory causes of drought in the southern portion of the province and to suggest plans for combating such causes. This Commission, described as a "Commission On Conservation and Afforestation," has already taken steps to assemble all pertinent data from the municipalities situated in the drought areas of the province, and, as part of its assigned duties is to recommend sites for dams for the conservation of water in the creeks and rivers of the south, the Government proposes to seek Federal aid in the erection of dams at the sites suggested. Personnel of the Commission: Hon. J. F. Bryant, K.C., chairman; Hon. Wat. C. Buckle, Minister of Agriculture; W. D. Cowan, M.P., for Long Lake; Dean MacKenzie, University of Saskatchewan; T. A. Patrick, M.D., and Lieut.-Col. F. J. O'Leary, Regina.

A complete review of the line of investigation which the Commission will follow is given in the following statement issued by the Chairman, Hon. Mr. Bryant:

"The commission on conservation and afforestation intends getting down to business as soon as possible, and in the meantime in order to assemble data, as chairman of the commission, I am today sending out to the secretary of each municipality in the dried-out areas of the province, a questionnaire asking that the council of the municipality co-operate with the commission in supplying the following information as carefully prepared as possible:

1. Name of municipality.

2. Number of farms. Number of abandoned farms, if any.

3. Has there been soil drifting in your municipality, and, if so, to what extent?

4. Number of groves of trees in the municipality.

5. Approximate acreage in trees in the municipality.

6. Number of farms with shelter belts.

7. Number of farms raising fruit trees, and with what results.

8. Number of farmers having dugouts on their property and whether or not there is any water, in same this year. Have they been dry at any time?

9. Number of wells that have gone dry, if any, in the municipality.

10. Number of acres owned by the municipality as a result of tax forfeitures.

11. Is said land suitable for agricultural purposes. If not would it lend itself to afforestation?

12. The kind of trees most commonly found in the municipality.

13. Are there any lakes, sloughs or large bodies of water in the municipality, and, if so, give the approximate acreage of water surface.

14. Please specify any points in the municipality where by the construction of a small dam as a relief measure water could be advantageously conserved.

In making application to Ottawa for relief moneys, the Government is suggesting that a portion of these moneys be set aside for the construction of dams as a relief measure, and therefore any suggestions as to possible sites for dams will be welcomed, and checked over by the engineers so that such action as might be deemed advisable could be taken in the case of the most desirable site mentioned.

In the interests of a moisture survey of the dried-out and semi-dried-out areas, steps are being taken to assemble all the data as to the rainfall in these districts since the commencement of the meteorological records by the Federal Government and by the Department of Agriculture in Saskatchewan. An effort will be made to ascertain whether or not present conditions are due entirely to an act of providence or whether it has been brought about in part by human activities such as cutting down the trees which originally formed a wind break and the draining of water areas and sloughs during the past 35 years in order to cultivate the land. In the spring some of our areas are veritable rivers, in the summer they are practically dry.

"The commission will endeavour to ascertain whether or not by impounding this water, and by damming the north Saskatchewan, the south Saskatchewan, Frenchman's Creek, Wood River, Notakee Creek, Swift Current Creek, Wascana Creek, Souris River, Moose Jaw Creek, Pipestone Creek and others, to form a series of lakes of considerable area, if this would be effective in preventing drought conditions.

"At the same time it would be desirable if each farmer in the dried-out areas would select a natural basin in his land to which the surface water drains, and make a dug-out; such dug-out not to be too wide because the water would evaporate with a wide surface, but to be made long and deep, and if later on trees were planted around the dug-out, the trees would catch and hold the snow and eventually the dug-out would furnish a permanent supply of water for the farmer and his stock. This would help very materially if there was a dug-out built during the slack times on every farm in the dried-out area.

"When the first settlers reached the State of Nebraska there was not enough wood to supply the wagon

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures flying over China, Captain Jimmy agrees to fly General Lu to Japan. Running out of gasoline, he is forced to land on a lonely island.

There we were on that lonely little island," General Lu said, "the Chinese Wall, the Lord; Chung, his faithful servant, Fu the Interpreter, Scottie and myself.

Rank and fortune suddenly counted for nothing. We were four hungry men—and a dog. Even General Lu had a huge fortune, which we had stored away in our plane would not buy us a square meal.

The sea stretched away on every side like a flat blue mirror. The island went back four or five miles and ended. Above, the sky rose in a huge empty dome.

"Look here, General," I said, "I am a traveling salesman. Well, perhaps I am not a very good judge, but to me those eggs sure seemed terrible."

The interpreter looked at me questioningly. "No like eggs?" Then he pointed meaningfully to the sea. "Fish, he go mightie fishes — easy catchee, hurr."

That was an idea. The shores of that island had never been touched in a thousand years. No doubt the water fairly teemed with fish. But the suggestion nearly cost the lives of two of us on the next day.

(To Be Continued.)

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. — Pound and half pound tins at your grocers.

Egg Market Prospect

Many Producers Are Renewing Their Faith In the Egg Market

The current issue of the Egg and Poultry Market Review, published by the Department of Agriculture at Ottawa, after calling attention to the definite turn for the better which is now apparent in the egg market throughout the Dominion, makes the following observation with respect to the present situation:

"Since early in the spring this publication has consistently pointed out the probabilities of the situation which appear now to be developing. A reduction in flocks, such as has taken place in many sections, was advised against. During recent weeks there has been an active demand for pullets, indicating that many producers are renewing faith in the egg market and are anxious to enlarge their flocks over the proportions planned for earlier in the spring."

A Television Broadcast

Moving Picture Shown In Department Store At Montreal

A small gathering at Montreal saw what was probably the first broadcast of a moving picture by television in Canada. The picture was sent out on the fourth floor of a local department store and presented on a receiving set on the fifth floor.

Through an instrument that looked like a phonograph horn with small mouth, behind which was a large revolving perforated disc and a special neon tube, a glimpse was caught of a tiny silhouette moving picture in black and white relating the adventures of "Fat Fanny Falling Fast and Furious."

He—"Oh, you musn't blame me for my ancestors."

She—"I don't. I blame them for you."

The Dragon

"You might have brought the boy out of the water dry, and . . . where's his cap?" — Hummel, Hamburg.

Lost Of It Used

Several drummers were seated in the smoking compartment of the train. They were bemoaning the generally demoralized conditions of business, as they found it. Finally they turned to the quiet little man in the corner.

"And how do you find things, brother?"

"Never better since I've been on the road."

"For the love of Pete and what's your line may we ask?"

"Selling red ink."

Distant ancestors of the horse, that lived in early geologic times, were no bigger than small dogs.

SINGLE PURPOSE IS TO RESTORE BRITISH CREDIT

London, England.—The new national government has already got down to its job of laying a firm foundation for British credit. Its opening meeting revealed complete unanimity in its task. It appointed the necessary small committees and proposes to go ahead as speedily as possible with the preparation necessary for new legislation.

The method of legislation, it is authoritatively intimated, will be such as to make it effective for immediate operation. It is stated, although not officially confirmed, that in effecting economies, the national government will seek parliamentary authority to proceed by order-in-council.

The government's scheme for balancing the budget and the restoration of British credit will have the double feature of reductions in expenditure and increases in taxation. The plan is to make the entire scheme a complete unity, and a characteristic of that unity will be the equal sacrifice according to position of various classes of taxpayers. In government circles statements that the burden of the new scheme will fall chiefly on those least able to bear it are described as absolutely untrue.

All controversial legislation now before parliament will be suspended. The new government proposes to concentrate on the supreme task of restoring credit, and in that task, it is stated in government circles, there can be no faltering.

Both Conservative and Liberal members of the new administration believe they will have behind them the virtually unanimous support of their parties. Rt. Hon. David Lloyd George and Lord Grey alike, it is understood, have signified their entire agreement with the Liberals in their acceptance of office.

Yet while an overwhelming majority of Conservatives and Liberals are backing the new government, Laborites are forming up behind the "rebels." After several hours' deliberation the general council of the Trades Union Congress, the national executive of the Labor Party and the consulting committee of the Parliamentary Labor Party unanimously decided that the new government should be vigorously opposed in parliament and by the Labor movement throughout the country. They expressed their approval of the action taken by certain ministers of the late government in declining to tender their support to the new administration, and recommended that the Parliamentary Labor Party constitute itself the official parliamentary opposition.

Raise In Gasoline Prices

United Protest From Western Provinces Is Urged

Calgary, Alberta.—Efforts to bring a united protest from all western provinces against increase in gasoline prices were instituted here by directors of the Alberta Motor Association.

The recent advance of one and one-half cents a gallon in the gasoline price was scored by the Alberta directors as unwarranted. Copies of the resolution embodying the criticism are being sent to all motor associations in Manitoba, Saskatchewan and British Columbia, urging similar action to be taken.

Printing Plants Wrecked

Montreal, Que.—Hopelessly ruined by sabotage of the printing presses and the firing of the plant, the weekly newspapers Le Morior, Le Chameau and Le Gogu will disappear from Montreal journalism. Joseph Menard, joint owner with Adrien Arcand, told the fire commissioner's court here at a hearing to probe circumstances surrounding the wrecking of the printing plant.

Had Stormy Trip

Southampton, England.—Owing to a violent storm in the English Channel, the Canadian Pacific liner "Empress of Britain" was unable to call at Cherbourg. When the liner docked at Southampton, Captain Latta said he had fought bad weather all the way across the Atlantic.

W. N. U. 1905

Destructive Wind Storm

Man Killed and Others Injured When Tornado Strikes Southern Saskatchewan

Estevan, Sask.—One man was killed, two others injured and heavy damage done when a tornado swept through Estevan and surrounding districts. While assisting workmen to pin down a tent during the height of the storm at a construction camp about two miles west of here, Robert Mitchell Henderson, 50, Calgary, partner in the bridge contracting firm of Mannix and Henderson, was killed instantly when struck by a flying timber. The missile hit him in the head, fracturing his skull. It has been decided that an inquest is unnecessary.

Louis Gonerey, of Estevan and Dalton McKay, of Saskatoon, laborers with the construction gang, suffered bruises and shock when struck by flying timbers and were brought to Estevan hospital for treatment.

The terrific gale sent box cars crashing into the round house at the Traux-Traer Coal Company Plant, while the roof of the grandstand at the exhibition grounds was ripped entirely off and several barns were blown down. The trestle bridge on the Neptune branch of the C.P.R., five miles from town, was splintered by the wind. A garage was blown down in Estevan, and the roof of the D. L. Irvine residence was torn off.

Historic Sites

Cairn Erected To Mark Landing Of General Wolfe

Sydney, N.S.—"To the honored dead of two nations."

This brief tribute, dropped by a squadron of Royal Canadian Air Force Planes, soaring high overhead, epitomized the spirit and thoughts of over 1,200 people gathered on the rocky bluff overlooking Kennington Cove to witness the unveiling by Hon. Frank Stanfield, Lieutenant-Governor of Nova Scotia, of the beautiful memorial cairn erected by the Historic Sites and Monuments Board of Canada, to mark permanently the site of Wolfe's landing on June 8, 1758, six weeks prior to the fall of Louisburg.

Lieutenant-Governor Stanfield pulled the cord unveiling the cairn which now permanently marks the site of Wolfe's hazardous undertaking.

Market For Butter

Canadian Dairy Produce Is In Demand In Great Britain

Montreal, Que.—Dairy produce from Canada is very much in demand among British buyers and consumers, and the British market can absorb all Canadian dairy farmers can send, Dr. J. A. Ruddick, Canada's veteran dairy commissioner stated here on his arrival from England.

"The prospects for butter especially are very good," said Dr. Ruddick. "Canadian cheese is also very popular and tops the market in its class."

Wheat Bonus

Winnipeg, Man.—Farmers are assured of the five-cent bonus on wheat pending arrangements now being made by the Board of Grain Commissioners, E. B. Ramsay, chairman of the board, stated here recently. Mr. Ramsay's attention had been drawn to a suggestion that farmers who have threshed wheat are withholding it from the market because the machinery for the distribution of the bonus had not yet been perfected.

May Withdraw Grants

Toronto, Ont.—Fall Fair Associations in Ontario may have to dispense with the usual government grants in 1932, according to a warning issued by Hon. T. L. Kennedy, Provincial Minister of Agriculture. The associations were warned that they must discontinue the practice of looking to the Provincial Government for financial assistance. This year the usual grants, estimated between \$80,000 and \$100,000, will be maintained.

Ban Use Of Benzol

Toronto, Ont.—Use of benzol in Ontario factories has been prohibited in an order issued by Hon. Dr. J. D. Monteith, Provincial Minister of Public Works and Labour. This use of benzol has been proven to the department to be injurious to the health of individuals. That fact has been demonstrated on the evidence of chemists who have investigated, and the labour department has prohibited the use of benzol," said Dr. Monteith.

KEEPER OF PURSE

J. A. McIsaac, Dominion Honorary Treasurer of the Canadian Legion of the British Empire Service League, who is busy preparing for the gigantic conference to be held in Toronto this week.

Trans-Canada Highway

Locations Of Final Sections Of Road In Ontario Announced

Toronto, Ont.—Designation of first sections of the trans-Canada Highway in Ontario was announced by Premier Geo. S. Henry following approval by the cabinet. This is the first step in commencing work for unemployed by the government at work camps in the north in conjunction with Federal Government grants.

Two sections are designated in the plan. The first section extends from Pembroke on the east, to Mattawa and hence westerly to North Bay. The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba boundary, following the north shore of Lake Superior to the village of Nipigon, thence to Port Arthur and Fort William, proceeding through Upsala, Dryden and Kenora.

Preparing To Send Goods To Australia

Good-Will Ship To Leave Montreal Late In October

Toronto, Ont.—Preparations for the despatch to Australia of a good-will ship, laden with Canadian goods for export to the Commonwealth are under way, according to a statement issued by J. E. Walsh, general manager of the Canadian Manufacturers' Association.

The vessel, "The Canadian Constructor," of the Canadian National Steamship Lines, will leave Montreal October 25, bound for Australian ports. A similar trip by the same ship from Australia to Canada will precede the trip for which arrangements are now under way.

Will Attend Conference

Mahatma Gandhi Leaves For London Parley

Simla, India.—After months of indecision and "heart-searching," Mahatma Gandhi has announced his "inner voice" has told him it would be to India's interest for him to go to London to attend the second round table conference.

At the end of almost three hours' conversation with Viceroy Earl Willingdon, who left a sick bed to see him, the Mahatma agreed to co-operate with the round table conference.

His decision was based on an attitude of "mutual accommodation and compromise." The Nationalist leader agreed to drop his demand for the appointment of an arbitration board to determine whether there have been breaches of the Delhi armistice and the viceroy consented to institute an inquiry into the alleged excesses of tax collectors in the Bardoli district.

Thus, after nearly 20 years' absence from England, Gandhi will set sail for London with Pandit Madan Mohan Malaviya and Mme. Sarojini Naidu, also delegates, and will reach his destination September 9. He will take aboard his goats to provide him with milk.

Defends Position

Hon. J. H. Thomas Says Nation's Interest Is Above Party

London, England.—In a letter to the executive committee of the Labor Party of Derby, the borough which he represents in parliament, Rt. Hon. J. H. Thomas defended himself for following Prime Minister MacDonald and joining the national government.

"I know my action will be misunderstood by many," he said in the letter. "I knew full well I should be subjected to criticism and abuse, but I also knew the nation's interest, which is greater than that of any individual or party, was at stake."

Mr. Thomas explained he had abandoned no policy and sacrificed none of his principles. "My only policy," he said, "has been to face boldly the grave emergency in the nation's affairs, and I have decided to remain in the new government only as long as the crisis lasts, and until stability is assured."

He added that in the elections which were inevitable, he would accept the verdict as a consequence of my own action."

Joins Up With Gandhi

Ahmadabad, India.—Forsaking the pleasure of the world, Miss Nilla Cram Cook, 21-year-old daughter of the late George Cram Cook, United States poet and playwright, has joined Mahatma's Gandhi's movement for the liberation of India. She is the first United States National to be admitted to his model colony, conducted on the banks of the Sacred Sarmati River.

CLUE TO NUNGESSOR'S FATE

John Gaucher (left) and L. V. Allers are shown reading the note they found in a cognac bottle off Fire Island. The note, reproduced below, is believed to be from C. M. Nungesser and Major Francois Coll, the intrepid French fliers, who took off from Paris on May 8, 1927, on a non-stop flight to New York. They were never heard of again. Translated from the French the note reads: "Sinking at this moment in Labrador." It bears a signature believed to be that of Coll.

RELIEF PLANS WILL EMBRACE PUBLIC WORKS

Ottawa, Ont.—Canada's Government is carefully considering a scheme to bring water from the Saskatchewan River to Moose Jaw and Regina, in southern Saskatchewan, according to a statement by Hon. G. D. Robertson, Minister of Labour.

Acting on a message from Hon. Robert Weir, Minister of Agriculture, now in the west, Senator Robertson has recommended to the Department of Public Works that a government engineer be sent to Saskatchewan to examine the possibilities of the proposal. Such a project, the Minister of Labour said, would no doubt operate to create wide employment facilities in that area.

A tentative agreement has been reached with the province of New Brunswick in the matter of unemployment relief, Senator Robertson said.

Details of the arrangement would, however, not be made public until Premier R. B. Bennett returns from western Canada and the recommendations are approved by the governor-in-council.

Conferences were proceeding between the minister and representatives of Manitoba.

It is expected that after discussing individual requests of the provinces the entire programme will be submitted to the governor-in-council within a few days.

Good Crops At The Pas

Acreage Is Limited But Yield Reported Remarkably High

The Pas, Man.—Fully two weeks behind some sections of the southern part of the west, cutting operations started last week on wheat and oat fields here. While there is only a limited acreage in this part of the country the yield has been remarkably high according to farmers in this district.

Oats have run as high as 50 bushels, while wheat has averaged 30 and 35 bushels. This is the fifth consecutive year that grain yields have been good in this area, and considerable interest is being taken in the possibility of throwing open the Carrot River Valley to settlers. This triangle of rich river silt has produced sensational yields for years, but as yet, only squatters are working the land, as it is not open to homesteaders. The local Board of Trade has received enquiries from farmers in the southern part of Saskatchewan regarding the possibility of establishing mixed farming in that area.

Cattle Prices May Be Lower

Ottawa, Ont.—Reporting on conditions now prevailing in cattle markets in the Old Country, the Canadian agricultural products representatives in Great Britain in a cable to the livestock commissioner here says: "Cattle markets weaker. Our best hope is strict selection for type and quality of all weights. Lower prices likely."

May Open Canadian Branches

Montreal, Que.—Six large industrial firms of the British Isles are seriously considering the establishment of branch factories in the Dominion during the coming year, F. W. Field, His Majesty's Trade Commissioner, told members of a service club, during an address on the industrial situation in Great Britain.

Will Deport Canadians

Windsor, Ont.—A number of Canadian citizens from widely separated parts of the Dominion have run afoul of the immigration authorities at Detroit and are held in Wayne County Jail awaiting deportation. Among the group are Henry S. Mabee, of Calgary, Alberta, and Gustave A. Auburn, Saskatchewan.

Celebrates Birthday

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labour, was 57 years old August 26. From the staff of the department Senator Robertson received a magnificent bouquet of roses, while numerous messages of congratulation came from friends and colleagues. The minister was born in Welland, Ont., on August 26, 1874.

Editor and PublisherNO SUCH ANIMAL AS
FREE ADVERTISING

There is no such thing as free publicity or free advertising, for the very reason that if the people who benefit by the advertising do not pay for it, then the newspaper has to pay for it, says the Cardston News:

It costs money to run this paper and if some people who think only of getting something for nothing would come in and look over our bills each month, they would get a new conception of the cost of running a newspaper.

When items are sent to this office as news items which are simply so much advertising, they will always find their place in the W.P.B. It is true, we did run a free "Swap Column" this spring for the benefit of the farmers who goodness knows have been hard enough put to it to carry on, and thought we might help them a little and offered that assistance. Whether they appreciated it or not does not matter so much, as the fact that it was used as an excuse by many others far more able to pay for it than we are, to seek "free publicity" for all sorts of things, and that to when such people are not subscribers to the paper. Some of these free publicity hounds have the nerve to say by their subscription account that the paper is not interesting to them, and yet they turn right around and want us to give them a big write up about their plans, which in the final analysis is but another attempt to put it over the public.

There is another class of free publicity which is less irritating, but which is none the less costly. It is the advertising asked for by celebration committees. These projects are worthy enough in themselves and we wish we could help them, but we would like to know if such committees go to the merchants in their stores and ask them for free shoes for the workers, free groceries, or free shirts. To ask a newspaper for free space is the same thing as asking a grocer for 20 pounds of sugar, or the hardware man for a gift from his shelves. Why then should the newspaper always pay when others are not asked to contribute.

This paper has the rule that no free publicity will be given to any project where a gate or admission fee is charged, or where money is expected to be made out of it. Another rule is that no readers or advertising will be inserted in the news columns of this paper unless the advertiser has already purchased a display advertisement, then such readers will cost 10c a line in addition to the display advertising costs.

We do not wish to appear unco-operative, but we have to meet expenses and we feel that a legitimate charge for advertising is the fairest way for the public to pay for the benefits derived from having a respectable newspaper in its community.—Strathmore Standard.

John O'Sullivan, one of the alleged leaders of the Communist demonstration last Saturday at Drumheller, was arrested in Calgary Wednesday on a warrant issued by the Drumheller Provincial Police. O'Sullivan is the ninth to be arrested under charges of being a member of an unlawful assembly. O'Sullivan ran as Communist candidate in the Drumheller riding at the last provincial general election.

Amazing Subscription Offer

\$2.00 WORTH For 3 Bushels OF WHEAT

That's Our Offer For New or
Renewal Subscriptions To
THE CARBON CHRONICLE

Deliver wheat to any elevator, anywhere, send us a cash grain ticket for three bushels No. 1 Northern, or its equivalent, and we will give you a new or renewal subscription to the Chronicle for one year.

This Offer Open to All Readers

For convenience we have attached a coupon to this advertisement. Fill it in and give it to your elevator manager. He will do the rest.

TO MEET THE FINANCIAL STRESS OF THE
TIMES THE CARBON CHRONICLE IS MAKING THIS
SPECIAL SUBSCRIPTION OFFER.

FIGURED IN DOLLARS AND CENTS AT THE

THE DUSTY HIGHWAY

BY CHRISTINE WHITING PARMENTER Copyright 1929

CHAUTER XXVIII.—Continued

"Yes, I know you. You have come before, but—but you always go just when I think you're real—just as he has gone. He went down in dreadful storm—my Nick! There are sharks in those waters, and—and other awful things. I've seen him fighting them—struggling—his hair all wet and matted. I—"

Fear was in her eyes now, fear for her best beloved. She trembled, and her voice rose higher. Desperate, Nick bent to her, speaking with slow distinctness.

"Listen, my precious little wife. I am Nick. I was not drowned. I did not fight those terrible things that haunt you. They are only a dream! but I am not a dream; could a dream hold your hands like this, Gay—and kiss them—like this? Look into my eyes. Can't you believe me, my darling?"

She drew her hands away, putting them to her head as if confused again.

"I—I believed before—and you went away."

Nick was breathing hard, as if at the end of a long race. Oh, if he could fight with his bare hands! he thought savagely. But to battle with something intangible—to conquer something unseen. . . . His jaw set grimly. He would conquer it! He would find a way to set Gay's tortured spirit free—to bring back the soul to her eyes. Perhaps if he began at the beginning—if he kept calm and steady, and took her back to their first days together—if he recalled to her poor, sick mind the vows he had spoken, wouldn't she understand? Wouldn't she know him?

He said, taking her hands in his: "Gay, you are breaking my heart. You think me a myth—an hallucination—a part of those dreadful nightmares, when all the time I am really Nick, come home after a long journey. But I shall make you believe me. Will you believe I am—if I tell you something that nobody in the whole world knows but just ourselves? I'll tell you where we were married, darling. It wasn't where everyone thinks

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35¢.

PUTNAM'S

W. N. U. 1905

It was, you know, in the office of that Justice of the Peace, with you looking every minute at Abraham Lincoln when you ought to have looked at me! The stars were shining when we were married, Gay, and somewhere not far away a hermit thrush was singing his evening song. We called it our bridal chorus—don't you remember? You were looking straight into my eyes, sweetheart, and I said: "God's a good enough witness for me, Gay; and I promise you now that I'll love you—and honour you—and be true to you. . . ."

Slowly, steadily, surely, the shadow was lifting from Gay's eyes. Watching, Nick scarcely breathed. As the distress and fear gave way, her face took on a new and magical beauty. It was like the slow, exquisite opening of a flower. She smiled; stretched out her arms; and cried, her voice echoing out gladly in that silent house:

"Nick! dear Nick, is it really you? Oh, if you love me, stay with me—stay with me. Don't leave me . . ."

She was in his arms.

"Never again," Nick promised as he held her close. "Never, never again . . ."

In the room below, Julie Nipps paused in the polishing of a candlestick, and with a wild sob threw herself on Janey Maxwell's breast; while, crouched on the stairs, where he had been listening tensely, for those welcome words, an old man raised eyes that were blurred with tears.

"Oh, God—our Heavenly Father," he said brokenly, "we thank thee—"

He arose, gasping, as if he could not breathe, and stepping into the air, looked up in rapture at the limitless blue above.

CHAPTER XXIX.

There followed days when Nick never left Gay's room save while she slept. If she awakened to find him gone her eyes would widen pitifully with fear that his return was but a dream. After the first, glad outburst of joy, she was alarmingly weak; but as the days passed and her strained nerves relaxed, the serenity that was the keynote of her character came back again.

Nick never forgot those days when he lived in dread of a relapse. But it did not come. Slowly, to be sure, but with encouraging steadiness, she returned from that dread "no man's land" where she had wandered; yet, unless he were at her side, it was days before she could remember the fact that her husband was really safe.

"I know I'm foolish," she said apologetically, "but your being here is so wonderful that I want to keep you a prisoner every minute."

"Keep me," Nick answered. "It's a case where the prisoner hugs his chains."

After the first, anxious week, those were happy days. Sometimes the little boys would steal in quietly, and climbing onto their father's knee, listen to his stories of the strange and beautiful islands he had seen. Of the storm, and the time that followed, Nick never spoke, nor did Gay ask.

Her dreams of the horror had been too vivid. Sometime, perhaps, he would tell her, but not now. Nothing but joy must touch her for the present.

It was three weeks before Halliday returned, and he came alone. Nick sometimes wondered what passed between him and Angela in the hours following her outburst. She did not appear again before Nick left the boat; and her husband's explanation of a sick-headache was accepted with polite credulity on the part of the Myers. It was only Nick who saw the Colonel's suggestively lifted eyebrows.

As for James Halliday, he seemed almost pathetically glad to be back in Bakersville; and small Martha was seldom absent from his side. It was on a Sunday morning that Sonny joined him, when he was instructing the little girl in the art of weeding a flower bed that was "all her own." The boy watched quietly for a moment, and then announced in a tone of pride:

"My baby sister's got a name. Her name's Nancy, same as Uncle Sim's old woman. What you think of that?"

"That's fine," said Halliday. He took a seat on the edge of Selina Smith's old rockery, and smiled at the little boy in his miniature overalls. "What does Uncle Sim say?" he questioned.

"Here comes Uncle Sim now. He said he was 'flabbergasted.' I guess he means surprised. He acted that way. Was you surprised, Uncle Sim?"

"Now what would I be surprised at?" asked Simeon, adjusting his

umbrella so that it sheltered little Martha's head.

"I mean about my baby sister having the same name as your old woman. You acted surprised."

"Well, and I was!" Simeon turned to Halliday, his face as beaming as a Jack-o'-lantern. "You could ha' knocked me down with a feather, and no mistake. Always thought if I had a girl o' my own I'd call her Nancy, but the good Lord never see fit to send us one, nor a boy neither. Seems like I love that little critter just like she belonged to me. When they told me they'd named her for my old woman I felt like my cup was runnin' over."

"Did it spill onto your bib, Uncle Sim?" asked little Martha sympathetically.

Halliday smiled, and Simeon grinned broadly.

"Seems like it did, honey. It spilled all over me in a nice, warm, comfortin' flood."

"Our shower bath can do that," said Martha. She arose, and leaned lovingly against Halliday's knee. "I wish we had a Nancy," she said quietly.

Halliday stroked her hair. (To be Continued.)

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in its blood. He himself was a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Rosyth and the wonderful aquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army, and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Bodyguard for Scotland, and belongs to no fewer than ten clubs.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon evolution, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

The plant which changed its nature at Cornell is the euchaena, the closest wild relative to corn. There are two species, Mexicana, the annual, and perennis, the perennial.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the appearances of a perennial. Then the annual portion dried up and disappeared, and the remaining stalk developed into a true perennial.

"One should prepare for old age as one prepares for a long journey."

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestones which possess certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicate that several deposits of impure limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock issuing in a small stream from the base of the furnace is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules hurtle through the air each develops a very thin, pliable glassy fibre behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvi, 3.

Except your Father lead you, You cannot find the way Among the snares and pitfalls, The lures that lead astray; Except you be like children, And hold the skirts of love, You'll miss the narrow pathway That leads from earth above.

—Mary Frances Butts.

Blessed are ye if ye become as a little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth; the blessing is the truth itself. He who sees the essential in the child—the pure childhood—sees the essence of grace and truth; in a word, real childlikeness. — George MacDonald.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Winnipeg Firms

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for about 40,000 tons of coal for its central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Expects Stork in July

"I Suffered such Pain"

MOTHER advised me to take the Vegetable Compound because I suffered such pain each month.

"It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound. My sister takes it too."

Mrs. Aubrey S. Smith, P. O. Box 104, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it, too?

Lydia E. Pinkham's VEGETABLE COMPOUND

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Wallsend, England, to Wellington, N.Z. The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the crew is living on the dock during the voyage.

Looking to the Future

Robert Gardiner, M.L.A., president of the United Farmers of Alberta, says:—

"Looking to the future I am confident that Alberta farmers will never be satisfied by any system of marketing that is not strictly co-operative in its basis, because no other system can meet their needs."

"By patronizing Pool elevators we can speed the day when the co-operative system will be firmly established as the normal method of handling our products."
